ABOUT US

Organograms are critical analytical tools that communicate vast amounts of data visually.

As an industry leader, OrgChart empowers businesses to optimise workforce decisions through dynamic visualisation of their HR data.

Your organograms have finally evolved from static pictures to automated visual business tools, allowing your data to drive critical workforce decisions every day!

What if you can see equity, skills, performance, grades, salary brackets or ANY other metrics needed to make workforce decisions in seconds?

And what if all this information is not in your HR system and scattered across various platforms?

No problem – OrgChart appends and combines data from multiple data sources into a single chart that is updated dynamically as you navigate through the org!

CAN YOU AFFORD TO BE WITHOUT ORGCHART?

The amount of time it takes to create an org chart manually is directly proportional to the number of people you need to chart.

The hours used to constantly create and maintain updated org charts, take time away from other business critical tasks and becomes a costly exercise.

OrgChart cuts the time required to create organograms by a factor of 10 times or more.

So maybe your HR system generates an organogram? Great – but how useful is this really if all you can see is a snapshot with names, titles, and positions?

WHAT DO WE BRING TO THE TABLE?

As a true Enterprise grade business tool, OrgChart automates the entire process of visualizing your organization – from importing raw data, to applying the relevant views, so that when a user logs in, they see an org chart specific to their needs and their data security settings.

Additionally, OrgChart offers two add-on modules that can serve as critical tools for you and your business:

- Planning module

- Point-in-time module

POINT-IN-TIME MODULE

Being unable to view or compare historic workforce information and structures, because the HR system is already updated with the latest info, is no longer a concern.

With the Point-in-Time module, you may choose to archive charts weekly, bi-weekly, monthly, quarterly, or even annually, to allow future access down to a specific date!
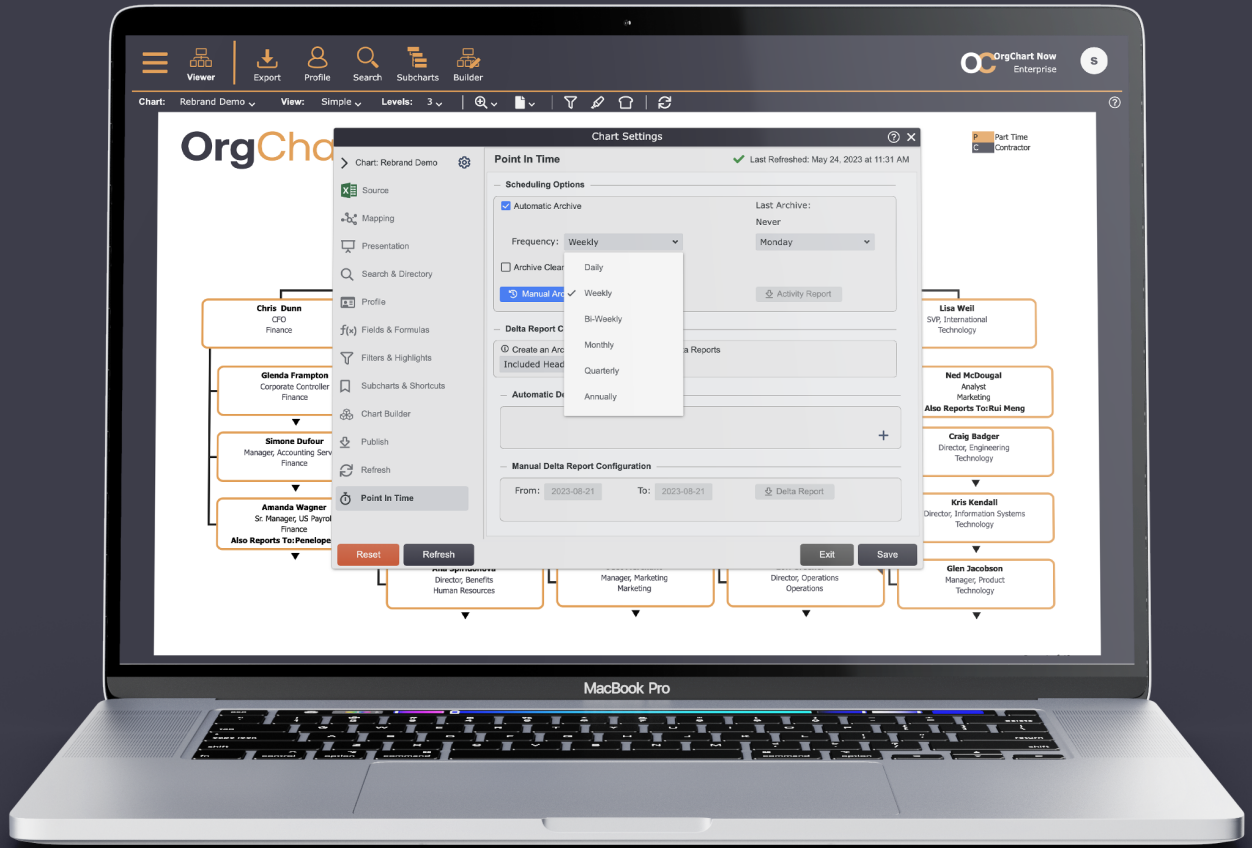

WHY POINT-IN-TIME?

- Point-In-Time is an add-on module to OrgChart that archives charts weekly, bi-weekly, monthly, quarterly and anually, This allows you to access your historical charts from a specific date!

- Previously, when data in a chart was refreshed, previous chart data was deleted, we now have a solution for this!

- OrgChart preserves a 'snapshot' of previous versions of a chart in an archive which can be accessed at will by the user.

- These charts can be loaded into the Workbench and manipulated like actual org charts, or compared against other charts.

WHY IS THIS USEFUL TO YOU?

Archive your charts with Point-In- Time, and automatically retrieve archived charts to view the organisational structures or workforce information of a specific past date, to meet audit or executive requirements.

PLANNING MODULE

Introducing the next generation in workforce planning – the OrgChart Planning Module.

Designed on feedback from hundreds of HR Professionals and augmenting the one-on-one sandbox functionality available as standard in OrgChart, this optional module facilitates collaborative organisational design exercises in real time.

Using up to date HR data, multiple stake holders can now work together simultaneously to create offline plans for budgeting, restructuring or mergers and acquisitions.

WHAT DOES PLANNING OFFER?

- *Manage Your Plan Metrics WHILE you plan*
Manage and view important plan and organisation metrics while you plan.

- *Track Your Changes*
View all the changes you and your team make in a concise order. Export these changes to Excel to easily share and get approval.

Elevate Your Team With Different Roles For Collaboration:

- Viewer – Read plans that have been share with that user

- Collaborator – Updated plans that have been shared with that user

- Administrator – View and modify all plans within the account, even those that have not been directly shared with that user
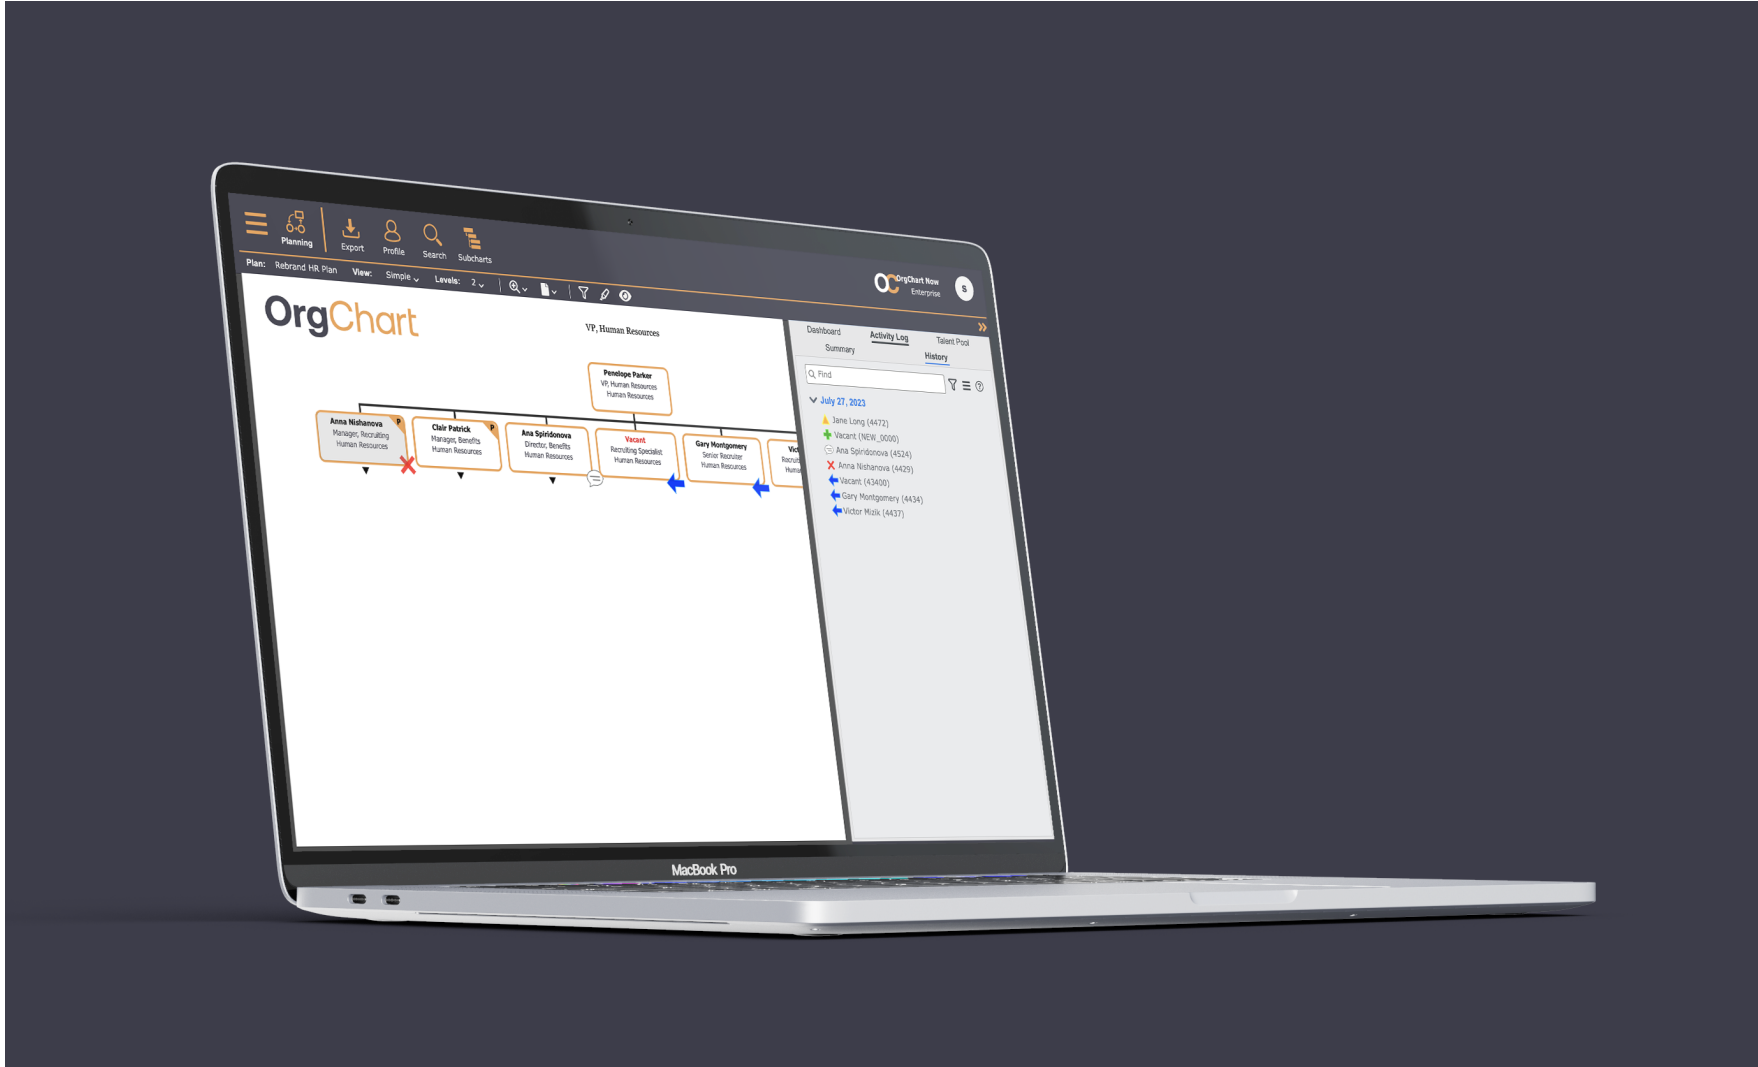

THE BETTER WAY TO DO WORKFORCE PLANNING

Interactive org charts are an intuitive way to do workforce planning.

OrgChart Now allows multiple people to collaboratively create cohesive workforce plans.

Create plans with your colleagues in real time, from anywhere, with our Cloud-Based solution.

The Collaborative Planning module is designed to facilitate organizational design exercises.
